**DETAILS OF PREPARATION OF "DISTRICT IRRIGATION PLAN" FOR UT OF DADRA AND NAGAR HAVELI UNDER PRADHAN MANTRI KRISHI SINACHAYEE YOJANA.**

**1. Background:**

Dadra and Nagar Haveli having total area of 491 sq.km. with a hilly terrain.

**2. Objective of the Scheme PMKSY:**

The broad objectives of PMKSY will be:-

- a) Achieve convergence of investments in irrigation at the field level.
- b) Enhance the physical access of water on the farm and expand cultivable area under assured irrigation (Har Khet ko pani).
- c) Integration of water source, distribution and its efficient use, to make best use of water through appropriate technologies and practices.
- d) Improve on-farm water use efficiency to reduce wastage and increase availability both in duration and extent.
- e) Enhance the adoption of precision-irrigation and other water saving technologies (More crop per drop).
- f) Enhance recharge of aquifers and introduce sustainable water conservation practices.
- g) Ensure the integrated development of rainfed areas using the watershed approach towards Soil and Water Conservation, regeneration of ground water, arresting runoff, providing livelihood options and other NRM activities.
- h) Promote extension activities relating to water harvesting, water management and crop alignment for farmers and grass root level field functionaries.
- i) Explore the feasibility of reusing treated municipal waste water for periurban agriculture.

This will in turn increase agricultural production and productivity and enhance farm income.

Expression of Interest is invited from the interested agency to prepare a "DISTRICT IRRIGATION PLAN" for UT of Dadra and Nagar Haveli under Pradhan Mantri Krishi Sinachayee Yojana.

**District Irrigation Plan:**

District Irrigation Plan (DIP) shall be the cornerstone for planning and implementation of PMKSY. DIP will identify the gaps in irrigation infrastructure.

DIP will present holistic irrigation development perspective of the UT outlining medium to long term development plans integrating three components viz. water sources, distribution network and water use applications incorporating all usage of water like drinking & domestic use, irrigation and industry. DIP will form the compendium of all existing and proposed water resource network system in the UT.

If possible Gram Panchayat wise irrigation plan is to be integrated depending on the available and potential water resources and water requirement for agriculture sector prioritizing the activities based on socio-economic and location specific requirement. Use of satellite imagery, topo sheets and available database may be appropriately utilized for developing District Irrigation Plan. Technical, financial and human resources available for this sector with departments of Rural Development, Urban Development, Drinking Water, Environment & Forest, Science & Technology, Industrial Policy etc. to be leveraged for comprehensive development of water sector.

Creating access to water source either assured or protective to each farm will require a demand and supply assessment of crop water requirement, effective rainfall and potential source of existing & new water sources considering geohydrological and agro ecological scenario of the districts. The master plan will include information on all sources of available water, distribution network, defunct water bodies, new potential water sources both surface and sub-surface systems, application & conveyance provisions, crops and cropping system aligned to available/designed quantity of water and suitable to local agro ecology.

All activities pertaining, to water harvesting, water augmentation from surface/sub surface sources, distribution and application of water including repair renovation and restoration of water bodies, major medium and minor irrigation works, command area development etc. are to be taken up within the frame work of this master plan. Proper integration of creation of source like dams and water harvesting structures, distribution system like canals and command area development works and precision farming to be made for deriving best possible use of water resources. Steps may also be taken for use of urban treated waste water for irrigation purpose.
